## **FIRESAFE FLANGE PROTECTION**

### **Fire Safety For Connections With Flange Insulation Kits**

The two pre-shaped shells are made from a propriety epoxy resin system densely filled with organic fibers, fastened over a flanged connection. The CFP provides leak visibility, can be installed and removed for Inspection or service and allows a standard G10 Flange Insulation Kit to pass an API 6FB fire test.

#### **Product Features**

- API Standard 6FB Fire test certification using standard G10 Flange Insulation Kit with G10 washers and sleeves.
- Safety shield for hazardous media leaks. Protection for service teams
- Allows use of high performing insulation kits, enhancing corrosion control performance
- Less time and expense to purchase and install compared to fire safe insulation kits
- Protects existing assets with no process/production interruption
- Custom Sizes, Colors and Shapes are available upon request.
- In stock for pipe size 1/2" to 6" (Consult Factory for Larger Sizes)
- Patent Pending
